

IITS Business Logic – Funding for Workplace Computers

Position requirements for central IT Funding:

IITS funds workstations for employees under the following circumstances:

- Position must be in a non-grant funded administrative or academic department.
- Position must be full-time and permanent. Contract and temporary positions are funded by department. Tenure track faculty positions are considered permanent for purposes of this logic.
- Responsibilities of this position must require a computer.
- IITS has not already funded a computer for this position.

In cases where a computer is needed for students, student workers, part-time staff, grant-funded departments, research or public interest centers, positions where the responsibilities do not require the use of a computer and positions where a Haverford-owned computer has already been issued are not funded centrally.
