**Turning Technologies Clickers**

1. Connect USB receiver to an open USB port on the computer.

2. Open the **TurningPoint** application on the computer. TurningPoint can be downloaded from [http://www.turningtechnologies.com/responsesystemsupport/downloads/](http://www.turningtechnologies.com/responsesystemsupport/downloads/)

3. Once the Turning Point Application opens, a small window will appear. This is where you can see what channel the receiver is set to, and where you can start a poll (Anywhere Polling), create question lists (Content), and view results (Manage).
4. To program the Response clicker to the receiver channel, press the Ch button on the clicker. Once you see the LED will flash green and red, enter the channel number using the numbers on the clicker, then press Ch to set the clicker to that channel. **NOTE:** The Receiver channel will be programmed by IITS before you receive your clicker package. You will only need this step if a clicker is accidently programmed to another receiver channel.

5. When you click on the **Content** tab, you will be able to create a new question list, or open and edit question lists. Once in the **Content** tab, click on the **Question List** dropdown menu, and then select **New**.

![Content tab](image)
A pop-up window will appear where you will be able to name your question list, and give it a description.

6. When creating a new question list, the following window appears.

If there is a correct answer, type the corresponding letter here.
When editing answer text, click on the question choices then type the answer text. When you’re finished, click the close button at the bottom right of the screen.

7. Once you create and save your question list, you can open the question list by selecting it from the bottom left corner of the Polling tab, then clicking the Anywhere Polling option.
8. Once you click **Anywhere Polling**, use the polling window to control the question list.

9. Once you’re finished polling, click the “x” in the upper left corner of the window. You will be prompted to save the session results. Results are automatically saved to the **Sessions** folder of TurningPoint (HD/Documents/Turningpoint 5/sessions) but can be viewed/managed under the **Manage** tab.
10. Once you save the session, the TurningPoint software will automatically bring you the **Manage** tab, and highlight the session. Click on the **Reports** button at the bottom right corner of the window to view the polling results.
