How to view videos created by students in the dropbox folder.

If you have created a dropbox folder for students to create videos, only the instructor(s) of the course and the students who created the video can view the footage. Below are instructions on how to access the videos.

1. Open a web-browser and visit hc.hosted.panopto.com

2. Under the USER LOGIN section, select Haverford College Moodle from the dropdown menu, then click Log In.

Once you click Log In, a page will load that looks like Moodle. Log In using your Moodle Username and Password, then click Login.
3. Once you log in to the server, you will see a list of your course folders to the left. These are the Moodle courses where the Panopto focus block has been installed. Find the course folder where the dropbox was created, then click the arrow to the right of the name to expand the list.
Select the 2nd folder in the course list, which is the dropbox folder.

4. You will then see all videos appear in the primary window. Click on their name to view the videos.
